OBJECTIVE

"Aspiring MCA professional with a strong foundation in computer applications and a growing passion for software development. Seeking to utilize my advanced technical skills and academic knowledge in a dynamic and challenging role"

EDUCATION

Master of Computer Application (MCA) 2025-2027 (Pursuing)
MA College of Engineering, Kothamangalam

Bachelor of Computer Application (BCA) 2022- 2025
Nirmala College, Muvattupuzha, CGPA: 6.58

Higher Secondary Education
St. Augustine's Higher Secondary School, Kalloorkad, Score: 80.75 2022

High School Education 2020
Holy Family Public School, Kalloorkad, Score: 73.4%

PROJECTS

Kudumbashree Unit Automation | PHP, SQL, HTML, CSS

- Developed a full-stack digital solution to automate daily operations for Kudumbashree units, replacing manual paper-based registers.
- Integrated modules for Member Management (Registration) and Financial Tracking (Savings, Loans, and Repayments) to ensure transparency.
- Streamlined internal communication and document storage, improving the overall operational efficiency of the unit.

Cinemascape Film Equipment Rental Platform | Flutter, MongoDB

- Developed a cross-platform mobile application for independent filmmakers and creators to browse and rent professional-grade cinema equipment.
- Implemented a seamless Category-based Navigation system to help users filter through high-quality gear (cameras, lighting, audio) efficiently.
- Designed a user-centric Rental Workflow including item availability checks and detailed product specifications for technical gear.
- Focused on solving local accessibility issues by providing a centralized digital marketplace for specialized film equipment.

Library Management System

- Developed a digital solution to automate library workflows, including book cataloguing, and member registration.
- Eliminated manual paperwork by transitioning records to a centralized database, reducing data redundancy and administrative errors.

INTERNSHIP

ERP Development Intern

Oxive Solutions Private Ltd, Thodupuzha

Developed a Fuel Management ERP module using ReactJS and NodeJS, streamlining tracking and reducing entry time via OR automation. Architected MySQL/Express backend for high-speed data retrieval

CERTIFICATIONS

IBM Cybfun 1.0 Cybersecurity Basics (edX)
